

We are listeners of the syndicated radio network K-LOVE. We are greatly concerned about the possibility of low-power FM stations displacing FM translator service. K-LOVE is a great benefit to our community and our country and it would be a grave disservice to lose this. Please do not allow new LPFM stations to take priority over FM translator service. Thank you for taking the time to read this, and best wishes to you in your work. Sincerely, Tony and Terri Neely, Lexington, KY
